Re: *Notice of Ex parte* presentation in MB Docket No. 04-186

Dear Ms. Dortch:

On May 11, 2005, Harold Feld of Media Access Project and Joseph Keren of Turbowave met with Karen Rackley, Alan Scrim, Hugh Van Tul and Bruce Franca of the Office of Engineering Technology to discuss the above captioned proceeding. Mr. Keren made a presentation based on the attached power point slides. Mr. Keren also discussed a successful demonstration for public safety organizations in Utah, and interest in the technology by public safety organizations in Boston and elsewhere. Finally, Mr. Keren provided Mr. Scrim with attached reference materials on field trials around the world using the DVB-T and DVB-T/RCT standards employed by Turbowave's technology.

Mr. Feld observed that the Turbowave technology demonstrates that real technologies exist that can satisfy the requirements of the NPRM and can be deployed as soon as the Commission establishes final rules. Mr. Feld also made clear that MAP does not represent Turbowave, but agreed to help Turbowave present its technology to the FCC.

In accordance with Section 1.1206(b) of the Commission's Rules, 47 C.F.R. § 1.1206, this letter is being filed with your office. If you have any questions, please do not hesitate to contact me.

Respectfully Submitted,

Harold Feld  
Senior Vice President
